B. Cement bond log (unless casing is to be squeezed)
10. Mail application with logs to the address listed above.

IMD Office Use Only Approved by: _____	Date: _____
---	-------------

The permitting process for Form UIC-32 is a two-step procedure:

- 1st Step: After the application is reviewed and found to be complete and to meet the requirements of LAC 43:XIX.129, an “**Approval to Recomplete**” letter with the signed Form UIC-32 will be issued. This will allow the applicant to recomplete the subject well as described in the application, **But Not To Inject**. A list describing the “**Reporting Requirements**” will be included with the “**Approval to Recomplete**” letter. The “**Reporting Requirements**” will tell the applicant what to file after recompletion of the well in order to receive the final “**Approval to Inject**”.
- 2nd Step: The well history, mechanical integrity test results, and logs are reviewed. If found adequate, an “**Approval to Inject**” letter will be issued, if not adequate, the applicant will be notified what remedial action, if any, can be taken to obtain an “**Approval to Inject**”.
